Starting engine / hybrid system if the electronic key does not operate properly

1. Put the shift lever in P and depress the brake pedal and hold it down (A/T)
2. Touch the key fob against the "ENGINE START STOP" switch in the "POWER" switch mode. A/T: Depress the brake pedal and hold it. M/T: Depress the clutch pedal and hold them down (M/T)
3. Press the "ENGINE START STOP" switch, keeping the brake pedal depressed (A/T) Press the "ENGINE START STOP" switch, keeping the clutch pedal and the brake pedal depressed (M/T)

*Follow the steps above if the key battery is low, or if signal interference prevents the key from communicating with the vehicle.

Stopping engine / hybrid system in an emergency

In an emergency where you want to stop the engine or the hybrid system in motion, or if the "ENGINE START STOP" switch is moving quickly, press it for 2 seconds or more, or press and hold the "POWER" switch for 2 seconds or more.
*See the Owner's Manual for further details.
